

[ PRODUCT SHEET ]

Product:	DURALink
	Standard and proprietary protocol conversion
	Run multiple protocols simultaneously, both serial and TCP/IP
	Operates on on highly reliable embedded Java Server, OJS

## DURALink – MANAGEMENT SYSTEM PAGING AND MESSAGING

DURALink enables the integration of management systems by converting their protocols into plain text for dispatch to user's handheld devices. Examples of the types of systems are:

**Healthcare**

- Nursecall & Wandering Patient

**Industry**

- SCADA & PLC

**Security**

- Access Control & Fire Panel

**Environmental**

- Building Management Systems

**IT & Communications systems**

- Email & SMS

**Features:**

- Standard and Proprietary protocol conversion
- Uses the OJS serial ports and TCP/IP port
- Can run multiple protocols simultaneously
- Industry standard protocols  
–e.g. TAP, PET, SLP, ESPA, DF1, Generic
- Unidirectional and bidirectional protocols available  
–e.g. SMS, Email (SMTP & POP)
- Inactivity timeout messages
- Resilient LINUX based appliance - no moving parts
- No software installations required - fully web based
- Logging of all protocol activity
